

Luis Isauro Zámamo Morales

B.S. in Computer Science

(442) 457-9383 | Corregidora, Querétaro | luisisaurozamano@gmail.com | zluis.site | GitHub/asdLuis | LinkedIn/Luis Zamano

PROFESSIONAL PROFILE

Software Engineer with hands-on experience across full-stack web development, cloud deployment, and agile delivery, complemented by projects in mobile development, machine learning, and game development. Comfortable building end-to-end features, automating deployment pipelines, and collaborating within Agile/Scrum teams to ship maintainable, production-ready software.

EDUCATION

Tecnológico de Monterrey, Querétaro Campus

Graduation Date: June 2026

B.S. in Computer Science | Videogames Specialization | GPA: 95

- **Relevant Coursework:** Software Planning, Development and Implementation | Agile Project Management | Software Construction and Decision Making | Security Integration in Networks and Software Systems

PROFESSIONAL EXPERIENCE

MyMetaverse

Lead Game Designer

June 2020 – August 2021 | Remote

- Cut issue-resolution time by 90%, measured by closed tickets, by implementing a version-controlled Git/GitHub workflow and a standardized wiki-based documentation system.
- Increased user retention by 200%, measured by recurring community engagement, by redesigning communication channels between the community and project leadership.
- Maintained 99.8% system availability, measured by active monitoring, by managing servers and coordinating incident resolution.

PROFESSIONAL PROJECTS

Tecnológico de Monterrey

Machine Learning Engineer

April – May 2026

- Achieved an F1-score of 0.83 detecting plagiarism across Java codebases by engineering lexical and structural similarity features (AST parsing, Jaccard/cosine similarity, n-grams) and training a Random Forest classifier.
- Achieved 95% recall on an early depression-risk detection model by preprocessing survey data and tuning hyperparameters in TensorFlow/Keras.

PixelPerfectStudio

Unity Developer | Game Developer

September – December 2025

- Built core gameplay systems and optimized WebGL performance for an educational game developed in Unity and C#.
- Coordinated sprint planning and cross-functional communication as a Scrum team member, aligning gameplay milestones with delivery deadlines.

Notarías 38 y 76

Backend Lead | Pixel.IT

February – June 2025

- Centralized documentation in version-controlled repositories, cutting information retrieval time from days to immediate access.
- Shortened the build-to-production cycle by integrating a CI/CD pipeline with GitHub Actions, AWS Amplify, and Vercel, eliminating 75% of the unresolved backlog under Agile methodology.

Asociación Mexicana de Wushu Kung Fu

iOS Developer | KFP

October 2024 – December 2024

- Delivered a native iOS app end-to-end in 3 months using Swift, SwiftUI, and MVVM architecture in Xcode.
- Structured 100+ content entries into reusable, version-controlled data models with Git, decoupling business logic from the UI layer.

Appix | Risk Manager Dashboard

Tecnológico de Monterrey

July 2024

- Built a real-time risk-reporting dashboard in JavaScript and Node.js, using green/yellow/red traffic-light classification for instant visibility into project health.
- Implemented backend logic and SQL queries to aggregate KPI data and power real-time monitoring of project risk indicators.

SKILLS & LANGUAGES

Languages: Native Spanish | Advanced English

Skills: Adaptability and Flexibility | Problem Solving | Data-Driven Decision Making | Stakeholder Empathy | Results Orientation | Project Management | Teamwork | Creativity and Innovation

Technical Skills: Java | React | JavaScript | TypeScript | Python | Node.JS | Express | SQL | MySQL | Git | GitHub | GitHub Actions | CI/CD | AWS | Agile | Scrum | C# | Swift | HTML | CSS
