

Luis Isauro Zámano Morales

B.S in Computer Science

(442) 457-9383 | luisisaurozamano@gmail.com | GitHub/asdLuis | LinkedIn/Luis Zamano | Corregidora, Querétaro

PROFESSIONAL PROFILE

Computer Engineering graduate with experience in project planning, technical documentation, process management, and application development. Experienced in preparing and maintaining project documentation, coordinating stakeholders, tracking deliverables, and supporting project execution through structured documentation practices. Strong analytical, organizational, and communication skills with a focus on continuous improvement, documentation control, and cross-functional collaboration.

EDUCATION

Tecnológico de Monterrey, Querétaro Campus

Graduation Date: June 2026

B.S in Computer Science | Videogames Design and Development Specialization | GPA: 95/100

- Relevant Coursework: Software Planning, Development and Implementation | Agile Project Management

| Software Construction and Decision Making | Security Integration in Networks and Software Systems

PROFESSIONAL EXPERIENCE

MyMetaverse

Lead Game Designer | June 2020 – August 2021

| Remote

- Reduced issue-resolution time by 90% by establishing a structured document control system including internal wikis, standardized documentation submittals, version tracking, and real-time access to project information across teams.
- Increased user retention by 200% by coordinating internal and external communication between the community and project leadership, including the distribution, maintenance, and tracking of project documentation and updates through shared platforms.
- Maintained 99.8% system availability by managing server resources, documenting operational anomalies through structured reporting processes, and coordinating incident resolution between users and project stakeholders.

PROFESSIONAL PROJECTS

MIGSO-PCUBED | PMO Vehicle Planning | March 2025

NovaDrive

- Achieved 100% on-time project delivery by developing end-to-end project documentation, Gantt schedules, risk matrices, and Bills of Materials (BOMs) using PMO methodologies and Microsoft Project-based planning practices.
- Maintained 100% traceability of project milestones and contractual deliverables by coordinating document submissions, technical deliverable tracking, and document control activities through shared documentation platforms, while reducing open action items by 75% through structured risk management processes.

Notarias 38 y 76 | Web application for process management | June 2025

Pixel.IT

- Reduced information retrieval time from several days to immediate access by designing a centralized document control system with standardized documentation submittals and version-controlled repositories accessible to all stakeholders.
- Enabled full environment replication in less than one hour and reduced unresolved action items by 75% by creating comprehensive Operations & Maintenance (O&M) documentation for backend infrastructure and coordinating stakeholder communication through Agile methodologies.
- Improved project visibility and control, measured through a 75% reduction in unattended or unresolved action items, by coordinating project activities, monitoring progress, and maintaining project documentation, records, and process updates.

Appix | Risk Manager Dashboard | Julio 2024

Tecnológico de Monterrey

- Enabled real-time project visibility for Project Managers by designing and documenting a risk reporting system with traffic-light status indicators (green/yellow/red), reducing critical issue identification time through structured probability and impact assessment metrics.

SKILLS & LANGUAGES

Languages: Native Spanish | Advanced English

Skills: Adaptability and Learning Agility | Analytical Problem Solving | Data-Driven Decision Making | Stakeholder Communication & Alignment | Results-Oriented Execution | Project Planning and Coordination | Cross-Functional Collaboration | Creative Problem Solving

Technical Skills: Python | C++ | C# | JavaScript | TypeScript | HTML | CSS | EJS | Swift | React | AWS | Vercel | Node.JS | MySQL | MongoDB | Unity | Blender | Git | GitHub | Ubuntu |
